

# Upland City Hall

## Gravel Surfaced

View of main entrance of City Hall.

Assembly is metal deck, covered with light-weight concrete, covered with 1" fiberboard insulation, covered with a 4 ply BUR set in hot asphalt, cover with a gravel surfacing.

Gravel surfacing is vacuumed, broom and vacuumed.

Surface tension is broken. Next, a leveling scrim of 1 ply of polyester is set in 15 gallons of emulsion.

A double pass of WeatherWeld seamless composite is applied.

Last, an energy star radiation control coating (RCC) is applied to the finished membrane.
